BREF'ens tilblivelse

- Hvad er KEIs ?
- Key Environmental Issues
- TWG medlemmer bliver spurgt om KEIs ifm. revidering af STM BREF.
- KEIs kan fx være:
Emissioner til luft og vand, diffuse emissioner såsom lugt og støj, vand- og energiforbrug og råvareforbrug og affaldsgenerering
- KEIs bør være datagenereret
- KEIs vil danne grundlag for BAT-konklusioner

At the Forum meeting in October 2015⁹, the Commission presented criteria for defining KEIs at the earliest possible stage of the information exchange for reviewing a BREF:

- criterion 1: environmental relevance of pollution caused by the activity or process, i.e. whether it may cause an environmental problem;
- criterion 2: significance of activity (number of installations, geographical spread, contribution to total (industrial) emissions in the EU);
- criterion 3: potential of the BREF review for identifying new or additional techniques that would further significantly reduce pollution;
- criterion 4: potential of the BREF review to set BAT-AELs that would significantly improve the level of environmental protection compared to current emission levels.

Kick off Meeting

Mail (20.4.2022) fra EU-kontoret.

KoM afholdes på følgende dage:

- **Monday, 30 May from 08:45 to 18:30,**
- **Wednesday, 1 June from 08:45 to 18:30,**
- **Friday, 3 June from 08:45 to 18:30,**
- **Tuesday, 7 June from 08:45 to 18:30.**

Vi kan få brug for sparring.

Inkl. Background Paper (BP) der opsamler IP bemærkninger og Eu's kommentarer.

Frist for Miljøstyrelsen er 15. maj for kommentarer.

Danmarks IP

Plenumdrøftelse af IP fra Danmark

Evt. væsentlige bemærkninger skal desuden efter mødet sendes til Miljøstyrelsen.

Deadline for at indgive bemærkninger er 6. maj. 2022.

Til orientering:

Der er indkommet 21 indlæg. 15 lande, 5 brancher og 1 NGO.

Typen anlæg der findes i EU

Country / main process applied	AT	BE	CZ	DK	ES	FI	NL	NO	SE	SK
Zinc plating and chromium passivation	16	11	48	22	76			10	30	
Hard chromium plating	9	4	12	10	1				7	
Chromium plating	9	4	26	6	28			4	11	
Nickel, autocatalytic plating (for subsequent chromium plating)		2	26	5	0			4	4	
Nickel, electrolytic	9		17	16	20			5	17	
Copper and copper alloy (brass) plating	4		17	9	7			3	9	
Cadmium plating	0		3		0			1	1	
Gold plating	2		0	5	0				3	
Precious metal plating (gold, silver, iridium, platinum)	4		6	4	0				3	
Anodising	10	13	15	13	54			1	10	
Hard anodising			11	6	0				2	
Conversion coatings, such as phosphating, chromating and others	19	20	49	9	31			2	15	
Continuous coil – large-scale steel	1	1	2		2				8	2
Sheet processing for aluminium lithography plates	0		0		0					
Printed circuit board manufacturing	3	1	0	1	0					
Total number of installations	35	86	232	106	219	46	141	30	68	2

Site visits

Er der virksomheder i Danmark der kunne ønske at vise virksomheden frem for TWG?

Table 2: Tentative timeline of the data and information collection

Step	Tentative time
EIPPCB to issue the first draft questionnaire template	September 2022
TWG feedback on the first draft questionnaire	October 2022
EIPPCB to issue the second draft questionnaire	October 2022
TWG feedback on the second draft questionnaire – Workshop on the questionnaire finalisation (if necessary)	November 2022
TWG to provide proposals of well-performing plants for the data collection via questionnaire	November 2022
EIPPCB to compile the list of well-performing plants and to check its completeness; if necessary, EIPPCB to ask TWG members to amend/complete the list	November 2022
EIPPCB to issue the third draft questionnaire	December 2022
Questionnaire testing	December 2022
EIPPCB to issue the final questionnaire to the TWG and distribution to the participating plants through the Member States' representatives	January 2023
TWG to provide bulk information in order to update the text of the SF BREF, namely information on applied processes and techniques, on the techniques to consider for the determination of BAT and on emerging techniques.	January 2023
Submission of filled-in questionnaires in BATIS	April 2023
